Malaysia's Drug Control Authority (DCA) granted conditional approval for the TAK-003 dengue vaccine, marking a significant breakthrough in dengue prevention.

As a dedicated healthcare professional, equip yourself with the fundamental knowledge about the vaccine and gain insights from our panel of experts on how to effectively incorporate it in your clinical practice.

Join us for an informative workshop where you'll gain insights into:

The safety and efficacy data of TAK-003 for dengue vaccine

Sharing of real-world dengue vaccination experience by practitioners

How to provide the vaccine in your clinics

Latest dengue updates in Malaysia

★★★★★

The workshop was excellent!

General Practitioner

★★★★★

I wish we had more time for the group activity session, the vaccine acceptance workshop was very engaging.

This event is co-organised by Dengue Prevention Advocacy Malaysia (DPAM) and Immunise4Life (IFL). DPAM is an independent advocacy group that brings together like-minded non-governmental medical and community organisations to synergise efforts in supporting the Ministry of Health (MOH) to strengthen dengue prevention, management, and control in Malaysia. IFL is an expert-driven community education initiative to promote immunisation for people of all ages against vaccine-preventable diseases and to address issues surrounding vaccination hesitancy and refusal.
